

Vacuum regulator, series REV 38

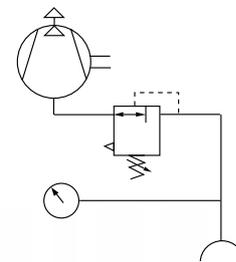

Applications:

Connected up to a vacuum pump or a venturi, the REV series vacuum regulator ensures an accurate and stable vacuum in a system. Its handwheel allows extremely fine adjustment, 0.13 mbar.

Characteristics:

Models	Adjustment range	Adjustment accuracy	Feed-through flow rate
	in mbar	in mbar	Nm ³ / h
REV 38	-13.3 to -1000	±0.13	16.2

Specifications:

Diaphragm	VITON
Material	Lacquered aluminium casting
Adjustment	By threaded pin
Mounting bracket	Supplied on standard basis

REV — 1
