MSLE series

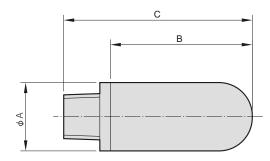

PLASTIC SILENCER

Order example:

Features:

- The Dragon Shing silencer is a porous polyethylene body moulded to a polyethylene (PE) adapter.
- With various adapters, the silencer can be screwed directly into the exhaust port of a control valve.
- The noise reduced as the exhausting air escapes to the atmosphere by expending through omni directional paths of the porous body.

■ Significant noise reduction & high air flow

With double layer design, significant noise reduction and high air flow can be achieved at the same time.

■ Easy installation

With different adapter, silencers screw directly to the exhaust port.

■ High working pressures

Working pressures up to 10.0 kg/cm².

■ Chemical resistance

High chemical resistance & Rust free.

■ Maintenance free

Oil and water are not able to affect polyethylene silencers.

- ullet MSLE-04-70 means a PT 1/2 silencer with 70 μ porous body.
- \bullet MSLE-06D-70 $\,$ means a PT 3/4 double layer silencer with 70 μ porous body.
- Port size out of specification is also available.
